55545

8-Unit  
55545-A1AAS

16-Unit  
55545-A2AAS

*The Exploration Station is Spectrum's solution to simplify charging of devices and storage of projects and supplies in one stationary location. Color-coded tote bins with covers provide convenient removable storage. Cord management system keeps cords organized and accessible at each tote bin.*

## Features and Benefits

- Keeps device charging and headphone storage neat and orderly
- Holds up to 8 or 16 devices and headphones in removable tote bins
- Front access cord management system keeps charge cords organized at each tote bin
- Tablets or phones can be charged directly on top of each bin cover
- Removable tote bins can hold individual projects or lessons
- Tote bins come in 4 colors with covers and can be arranged in any order
- Durable top and base panel made from scratch and impact-resistant high-pressure laminate
- Powder coated, heavy-gauge steel construction is built to last
- Available in Steel Mesh laminate and Warm Gray metal
- UL-Listed 8-outlet 120V power strip(s) with 3550 joule surge suppressor and generous outlet spacing accommodate both inline and wall adapters (one on 8-unit, two on 16-unit)
- Ships KD (knocked-down) and requires assembly
- Warranted to be free of all defects in materials and workmanship for 10 years
- Designed and assembled in Chippewa Falls, WI, USA

### Color Options

Metal

Laminate

Steel  
Mesh

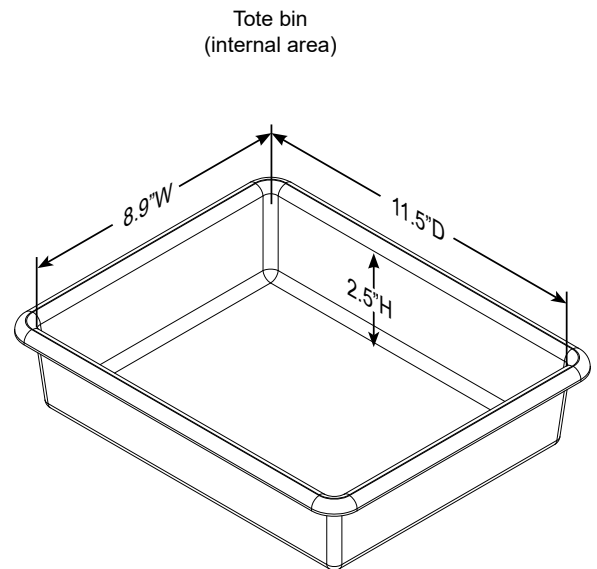

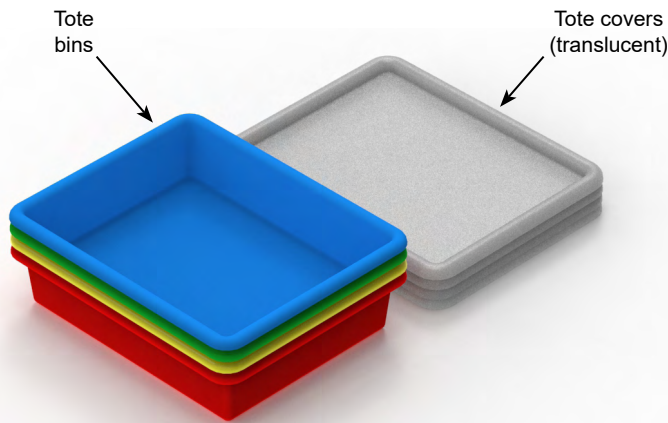

# Construction

- The top and base panels are constructed from 3/4" thick composite board with .030" high-pressure laminate on one face, and a balancing phenolic backer on the opposing face.
- Metal components consist of 20-gauge steel
- Top and base panel edges are covered with 3mm vinyl
- All metal components are finished with a scratch-resistant powder coat epoxy
- Each unit is shipped KD (knocked-down) and requires customer assembly.
