Customized Logo Panel for Slim Lectern 55513

Tools Required

1. Mark hole locations on lectern

- Using a pencil and measuring tape, measure out and mark a centered vertical line on the audience-side panel. **Figure 1.** Use two points (one on top, one on bottom) to establish the line-this will provide the most accuracy.
- Using the template on p.3, measure and mark 1.44" down from the top of the panel to mark a level horizontal line on the audience-side panel.
- Using the template, measure 9.567" down from the first line to mark a second horizontal line on the audience-side panel.
- Place the logo panel up against the curved panel and mark the 4 hole locations.

2. Drill hole locations

- Place masking tape on the laminate at the (4) hole locations.
- Carefully drill through the audience-side panel at the (4) hole locations using a 5/32" drill bit. **Figure 1.**

Figure 1

2. Install logo panel

1. If you have a laminate backer, place it under the logo panel.
2. Secure the logo panel to the lectern with (4) 6-32 x 1/2" PH thread-cutting screws and (4) 6-32 keps nuts on back. **Figure 2.**
3. Tighten all screws securely.
