1 Remove covers from LED controller

1. Using a micro flat head screwdriver, remove the two plastic covers from the controller.

2 Connect driver adapter wires

1. With the power unplugged, place the driver adapter power wires into the selected slots.
2. Tighten securely.

3 Connect RGB wires to controller

1. Place the RGB wires from the 12" RGB F to M cable link into the selected slots.
2. Tighten securely.

4 Connect and test LED's

1. Connect the LED components as shown and make sure both tape strips light up.

LED Controller

12V Power supply (connect to power strip or wall outlet)

6" Driver adapter

12" RGB F-to-M link

12" LED tape strip

6" Interconnection cable

Plus connector

Assembly tip: If the LED tape lights do not light up, check polarity of connectors. They may need to be disconnected, rotated 180-degrees and reconnected.

5 Apply LED tape to bracket

1. Apply the 12" LED tape strip to the bracket flanges with the connectors pointing toward the cord channel.

12" LED tape strip

4" LED light tape

LED light bracket

Connectors toward cord channel
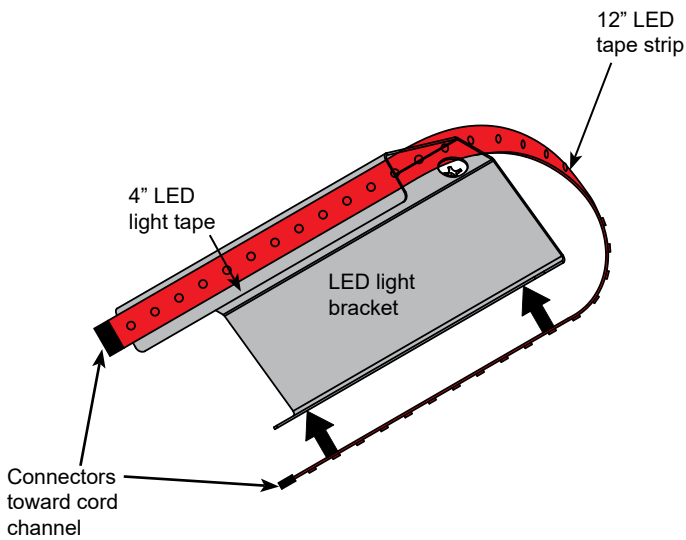

6 Attach LED light bracket

1. Attach the LED light bracket centered under the worksurface with (2) #14 x 3/4" PHSM screws.

Worksurface

LED light bracket

#14 x 3/4" PHSM (2 required)
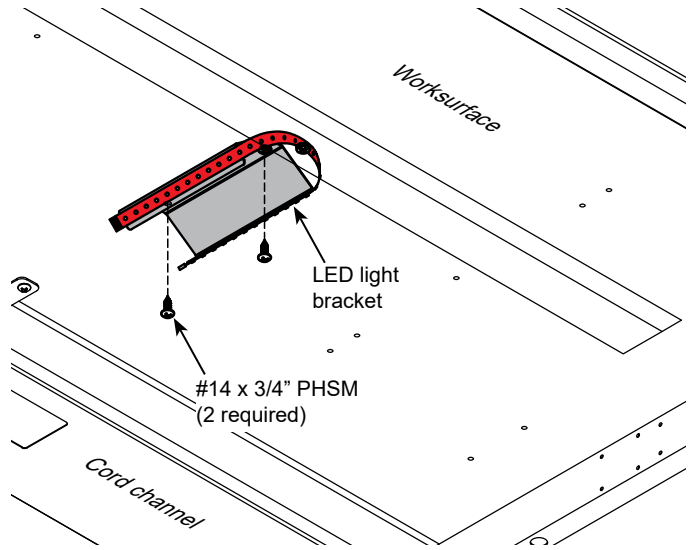

Cord channel

7 Connect LED components

1. Connect the components under the worksurface as shown while routing them through the desk cord channel.
   (Note plus connector and LED tape will not go in the cord channel.)

12V Power supply

LED Controller

72" interconnection cable to plus connector on next desk

6" Driver adapter

12" RGB F-to-M link

Cord channel

Plus connector

6" Interconnection cable

4-pin connector

12" LED tape

LED light bracket
