

TEACHER'S CONSOLE

Instructor's Media Console™

Command center

A wide array of rack rail options can be used to complement any audio visual arrangement with the IMC. Even special ergonomic needs are addressed with standard 29" and 36" worksurface heights.

Flexibility

Spectrum offers combinations for every classroom solution

Simple Solution

Choices

- Even special ergonomic needs are addressed with standard 29" and 36" worksurface heights
- Define your classroom needs and then configure your furniture to support those needs

Smart Design

- 4 worksurfaces and equipment rack make up the base IMC components
- Components are designed to let the customer choose a common layout or create their own console
- Equipment rack powers the IMC configuration, but can stand alone when a single worksurface is added

Functional

- Modular design allows you to construct the ideal console that best fits your needs and environment
- Value is built into the IMC through numerous choices of worksurface, components, height combinations, and technology integration
- Consoles ship with all necessary hardware and field-tested, easy to follow assembly instructions

Robust Construction

- Powder coated steel construction
- Built to withstand even the busiest public areas
- We combined the robust steel frame with an attractive laminated surface and you have a stylish and effective media console
